

Join us at the 2018 Watershed Discovery Day!

Our Annual Watershed Discovery Day, on Saturday, August 18, will answer your questions on our local water, lakes and streams, how they are managed, and the present challenges facing them. You will also find out about the programs that can help you address them.

This event for all the family presents displays and experts from: Watersheds Canada; Rideau Valley Conservation Authority; Rideau Environmental Action League; the Town of Perth; Lanark County Stewardship Council; Ottawa Riverkeeper; and our own association - a one-stop-shop for all of your water questions.

This year, Watershed Discovery Day features the recently released Tay Watershed Report, providing an opportunity to hear first-hand about the state of the Tay watershed and the condition and trends of its many lakes and streams. We will also have information on the current drought and low water situation throughout the watershed.

For the children, there will be the Story Corner, with the Perth and Union Public Library, our association's 'Fish Pond', where children may try their skill at identifying the invasive species of our area, and a Book table and book draw.

Pick up a T-shirt, renew your membership for a chance to win a gif certificate to Maximilian's Restaurant, and relax with your association friends.

The Perth Farmers' Market also offers wonderful fresh produce, baking and perennials, located at the Crystal Palace in downtown Perth, overlooking the Tay Basin.

This great morning of information, entertainment and wonderful local produce is possible through the generous partnering with Perth Farmers' Market, Little Stream Bakery, Town of Perth, Maximilian's restaurant, Stor N Lock Perth, and the Rural Clean Water Program of Rideau Valley Conservation Authority.
