

Greetings Friends !!

You are invited to attend a Microsoft TEAMS SEMINAR . . .

Friends of the Tay Watershed is working in partnership with the Rideau Valley Conservation Authority to deliver a series of informative seminars over the next several months which we believe will be of interest to members of the Friends, the various lake associations and their members and indeed, to the public at large.

We hope you will be able to Zoom in on this first seminar and all of our upcoming sessions.

Topic: Trees and Climate Change

Date:

November 18, 2020 at 2:30 pm

Presenter:

**Ian Cochrane, Forestry Technician,
Rideau Valley Conservation Authority**

To Register:

**Contact Glenn Tunnock, President, FoTW,
at gtunnock@tunnockconsulting.ca**

The climate of the world is changing, and our forest is going through dramatic upheaval over the next several decades and century. Trees and Climate Change is the first in our series.

Trees and Climate Change will present:

- the basics of climate changes
- forest succession
- the history of Eastern Ontario's forests since the ice age to present day and where the forest is projected to be in 2080-2100

- the anticipated effects of climate changes on a single tree, a forest and ecosystems based on these projections
- options for landowners to help mitigate climate change
- what foresters/nurseries are doing to grow forests that will provide for today and be resilient for tomorrow

Research is showing that trees are being affected by climate change, as well as playing a major role in helping to mitigate climate change. Join us for this informative and timely presentation.

If you need further information, please feel free to contact Glenn at 613 464-8805.
